

RF Shielded Box

Product Model : KH-EM6857-6G

Designed For Use With Shielded Box Or Microwave Anechoic Chambers:

Designed for testing radio electronic products and wireless communication products, covering power testing, sensitivity testing, EMI/EMC testing, and RF functional testing.

Applications include mobile phones, wireless routers, wireless network cards, Bluetooth devices, WLAN devices, PDA devices, GPS, and anti-theft lock testing. Features dual USB 2.0 ports, DC with a maximum current of 3A (other product interfaces include USB 3.0, DB9, D25, RJ45).

Performance Specifications:

Dimensions: 120mm (W) * 68mm (D) * 57mm (H)

Attenuation/Isolation: 600MHz~2.4GHz ≥ 70 dB; 5.8GHz ≥ 65 dB

Effective Attenuation Frequency Range: 100 MHz~6 GHz
